DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.. The new abstract is required before paying the issue fee.

Drawings

2. The drawings filed on 01/07/1998 are acceptable subject to correction of the informalities. In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance. The formal drawing is required.

Allowable Subject Matter

3. Claims 25-56 have been allowed.

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance:

The prior art of record issued to Gutenson and Humphrey either alone or combine fails to teach or suggest a panel having an electronic information distribution section including a group of connectors, each group of connectors corresponds to a location in a structure, as recited in claim 45 and similarly in claim 48 with CAT5 connector and other connectors. and further in details as in claims 25, 36 and 41. In addition, Humphrey discloses an intra-building telephone system that allows assignments of telephone extensions to individual phones from a central telephone patch box; however, Humphrey needs multiple incoming telephone lines equal in number to the number of extensions being assigned. The combination of Gutenson and Humphrey simply do not come up to the claiming invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion
